## 1. General

Lorentzzi brand DH48S - S digital display time relay is a circular delay-type time relay suitable for control circuits with an operating supply voltage of up to and including 380V AC (50/60Hz) or a DC operating supply voltage of 220V. It serves as a time - delay component to make or break circuits based on preset time. This product adopts a large-scale integrated circuit as a processor and possesses excellent EFT (Electrical Fast Transient) and ESD (Electrostatic Discharge) anti - interference performance.

## 2. Terminology Interpretation

Circular delay: After setting the make and break time for the time relay and powering it on, the product will always operate in a circular OFF - ON state, where the ON and OFF durations correspond to the preset make and break time.

## 3. Time Setting Method

[www.lorentzzi.com](http://www.lorentzzi.com)

NO.	Unit	Time Delay Range
1	0.1 S	0.1~9.9 S
2	1.0 S	1.0~99 S
3	0.1 M	0.1~9.9 M
4	1.0 M	1.0~99 M
5	10 S	10~990 S
6	0.1 H	0.1~9.9 H
7	1.0 H	1.0~99 H

Time setting example: Suppose we need a cycle where the circuit breaks for 5 minutes and closes for 3 minutes, we can select this product. Set the OFF time as "0", "5", "M" and the ON time as "0", "3", "M". After power - on, it will operate in accordance with the preset working mode.

#### 4. Main Technical Data

Model	DH48S - S
Operating Power Supply	36VAC, 110VAC, 220VAC or 380 VAC, 50/60 Hz; 12VDC, 24VDC
Operation Model	Circular delay
Time Delay Range	0.1~9.9 S, 1.0~99 S, 0.1~9.9 M, 1.0~99 M, 10~990 S, 0.1~9.9 H, 1.0~99 H
Repetitive Error	≤ 1%
Number of Contacts	1 group of contact output (model: DH48S - S - 1Z); 2 groups of contact output (model: DH48S - S - 2Z)
Contact Capacity	AC250V, 5A; DC24V, 7A
Service Life	Electrical life: > 100,000 cycles; Mechanical life: > 1,000,000 cycles
Installation Type	Panel - mount, rail - mount
Temperature Range	Operating ambient temperature: -5°C – 45°C; Storage ambient temperature: -20°C – 70°C

## 5. Outline And Installation Dimensions (unit: mm)

[www.lorentzzi.com](http://www.lorentzzi.com)

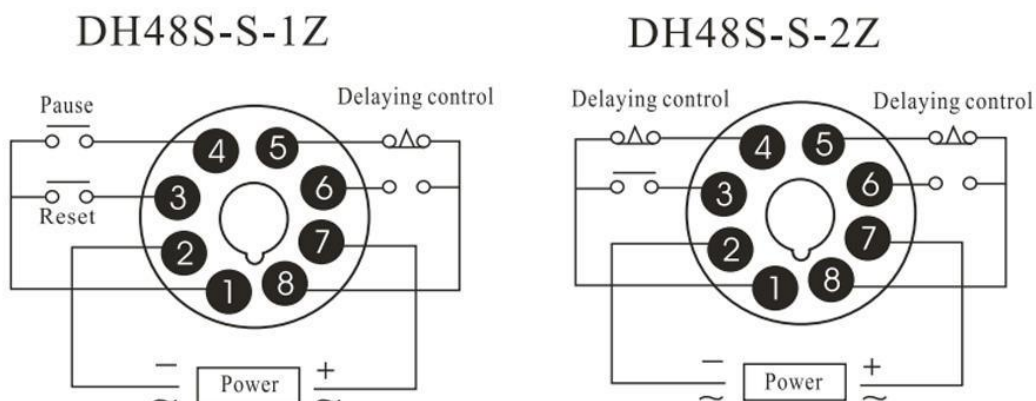

Installation dimensions:

Panel type: Cut - out size is 46mm × 46mm.

Rail type: Compatible with 35mm rails.

Installation type: Hole spacing is 33mm, and mounting screws are 2 - M4 × 20mm.

## 6. Wiring Diagram

## 7. Notices

- 7.1. For the relay's memory function, preset the delay time before powering on, as presets made after power - on won't take effect. Also, ensure the interval between repeated startups is at least 0.5 seconds.

- 7.2.** Strictly follow the wiring diagram on the time relay's enclosure for proper wiring. The operating voltage and frequency must meet specifications.
- 7.3.** Reset function: The relay resets to zero when the reset terminals (① and ③) are connected. It starts timing when these terminals are disconnected.
- 7.4.** Pause function: During timing, connecting the pause terminals (① and ④) pauses timing and displays the current time. Disconnecting them resumes timing.
- 7.5.** In high - current environments, use shielded conductors if "reset" and "pause" terminals connect to long wires. Never apply voltage to these terminals to avoid product damage.
